* Operating income after depreciation including share of associated company's income, including headline adjustments in share of associated income, including profit on disposal of assets (not included in capital items) and excluding minority portion.

** Prior year figures have been restated to reflect IFRS adjustments.

During the period under review, all export door facilities have been discontinued, but re-directed to doubling the manufacturing capacity of doors for the local market. This restructure, as well as the closure of the facility of Steincraft (outdoor furniture) were necessitated by substantial increases in local timber prices, coupled with other factors which led to uncompetitiveness in Steinhoff's traditional export markets, mainly due to an oversupply of related products in those markets.

Notes

1. BASIS OF PREPARATION AND CHANGES IN ACCOUNTING POLICIES

The Group has adopted International Financial Reporting Standards (IFRS) for the year ending 30 June 2006. The condensed consolidated interim financial statements have been prepared in accordance with IAS 34: Interim financial reporting, and in compliance with the Listing Requirements of the JSE Limited. These are the Group's first IFRS condensed consolidated interim financial statements (for part of the period covered by the first IFRS annual financial statements) and IFRS 1 – *First-time adoption of International Financial Reporting Standards* has been applied.

The financial statements are presented in rand, rounded to the nearest thousand. They are prepared on the historical cost basis except certain financial instruments and plantations, which are carried at either fair value or amortised cost, as appropriate.

These condensed consolidated interim financial statements have been prepared on the basis of IFRS and interpretation statements in issue that will be effective at the Group's first IFRS annual reporting date, 30 June 2006. As a result of ongoing review and possible amendments by interpretive guidance from the International Accounting Standards Board and International Financial Reporting Interpretations Committee, IFRS finally in effect at 30 June 2006 may differ from IFRS and interpretation statements applied in preparing the condensed consolidated interim financial statements.

An explanation of how the transition to IFRS has affected the reported financial position and financial performance of the Group is provided in note 2. Note 3 includes reconciliations of equity and profit or loss for comparative periods reported under South African Statements of Generally Accepted Accounting Practice (SA GAAP) to those reported for those periods under IFRS.

2. EXPLANATION OF TRANSITION TO IFRS

As stated in note 1, these are the Group's first condensed consolidated interim financial statements for part of the period covered by the first IFRS annual consolidated financial statements prepared in accordance with IFRS.

The accounting policies adopted under IFRS have been applied in preparing the condensed consolidated interim financial statements for the six months ended 31 December 2005, the comparative information for the six months ended 31 December 2004, the financial statements for the year ended 30 June 2005 and the preparation of an opening IFRS balance sheet at 1 July 2004 (the Group's date of transition).

In preparing its opening IFRS balance sheet, the Group has adjusted amounts previously reported in financial statements and interim reports prepared in accordance with its previous basis of accounting, SA GAAP.

A summary of significant changes to the Group's accounting policies following the adoption of IFRS and exemptions elected under IFRS 1 – First time adoption of IFRS is contained in note 4.

An explanation of how the transition from SA GAAP to IFRS has affected the Group's financial position and performance is set out in the tables in note 3 and the notes accompanying them.

3. RECONCILIATION BETWEEN IFRS AND PREVIOUS SOUTH AFRICAN GENERALLY ACCEPTED ACCOUNTING PRACTICE

The following reconciliations provide a quantification of the effect, after taxation, of the transition to IFRS:

RECONCILIATION OF EQUITY AND PROFIT AND LOSS

Notes	1 July 2004 (R'000)	31 December 2004 (R'000)	30 June 2005 (R'000)

Profit for the period attributable to equity holders of parent reported under IFRS	662 783	1 555 278

4. SIGNIFICANT CHANGES TO THE GROUP'S ACCOUNTING POLICIES FOLLOWING ADOPTION OF IFRS AND IFRS 1 – FIRST TIME ADOPTION ELECTION OF EXEMPTIONS

4.1 Business combinations

The Group previously applied the requirements of AC 140 and applied the revised accounting policy to all business combinations *with an agreement date* on or after 31 March 2004.

The Group has made an election in terms of IFRS 1 to apply the requirements of IFRS 3 to all business combinations *with effective dates* on or after 1 April 2004. The classification and accounting treatment of business combinations with effective dates prior to 1 April 2004 has not been reconsidered and previously reported goodwill has been included on the basis of its deemed cost.

4.2 Property, plant and equipment

IAS 16 – Property, plant and equipment (IAS 16) differs in certain respects from the previous SA GAAP equivalent, AC 123 – Property, plant and equipment (AC 123), applied by the Group until 30 June 2005. IAS 16 states that an entity is required to measure the residual value of an item of property, plant and equipment as the amount the entity estimates it would receive currently for the asset if the asset were already of the age and in the condition expected at the end of its useful life. The Group has previously, under SA GAAP, accounted for residual values based on the requirement of AC 123.

Where parts (components) of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment. Residual values and useful lives of all assets are assessed annually. In addition, depreciation of an item of property, plant and equipment is to begin when it is available for use and ceases at the earlier of the date it is classified as held for sale or the date that it is derecognised.

The Group has assessed the useful lives and residual values of all individual components of property, plant and equipment and adjusted the carrying values of some items at the date of transition accordingly.

The adjustments to the residual values and useful lives of certain items of property, plant and equipment and the corresponding change in their carrying values at 1 July 2004 has also impacted depreciation charges subsequent to 1 July 2004.

The Group has made an election in terms of IFRS 1 to measure certain items of property, plant and equipment at the transition date to IFRS at their respective fair values and used those fair values as deemed cost at that date. The Group adjusted the carrying values of the individual items of property, plant and equipment for those specified items to which the exemption was applied.

Changes in estimated decommissioning and restoration liabilities that occurred before the transition date to IFRS have been adjusted for at the transition date on a net basis in accordance with the provisions of IFRIC 1 and the applicable exemptions under IFRS 1.

4.3 Share based payment transactions

The fair value of share options under employee share incentive schemes and other equity instruments granted to Group employees is recognised as an employee expense with a corresponding increase in equity. The fair value is measured at grant date and expensed over the period during which the employee becomes unconditionally entitled to the equity instruments. The fair value of the instruments granted is measured using generally accepted valuation techniques, taking into account the terms and conditions upon which the instruments are granted. The amount recognised as expense is adjusted to reflect the actual number of share options that vest except where forfeiture is only due to market conditions not being met. This accounting policy has been applied to all equity instruments granted after 7 November 2002 that had not yet vested at 1 January 2005. The fair value of share based payments was not recognised under the Group's previous accounting policies.

4.4 Black economic empowerment transactions

a. Transaction recognition criteria

In circumstances where portion of the equity in a subsidiary company is disposed and serves as security for the funding of the proceeds receivable, the accounting recognition of the disposal of such shares in the Group financial statements is deferred until the funding subject to the security of the equity sold has been fully repaid. In previous years, such transactions were recognised upon entering into the respective sale agreements. The comparative results and financial position have been restated accordingly, which has had no effect on profit attributable to ordinary shareholders.

b. Share based payments

The group is extending the scope of IFRS 2 – *Share based payments* to include the Group's black economic ownership initiatives in accordance with international interpretations in this regard. Where goods or services are received from black economic empowerment partners as consideration for equity instruments of the Group, these transactions are accounted for in terms of IFRS 2, even when the entity cannot specifically identify the goods or services received. This accounting policy is applicable to equity instruments that had not yet vested by 1 January 2005 and thus had no application in the current period.

4.5 Foreign operations

The Group has made an election in terms of IFRS 1 that cumulative foreign currency translation reserves in existence at the transition date, 1 July 2004, arising from the previous application of SA GAAP have been reset to zero by being transferred to opening retained income.

4.6 Designation of previously recognised financial instruments

The Group has elected, in terms of IFRS 1, to designate certain financial liabilities previously recognised at amortised cost to fair value through profit and loss. The rationale for the designation was to eliminate an accounting mismatch arising from measuring related assets and liabilities and recognising gains and losses on them on different bases.

4.7 Common control transactions – premium and discount arising on subsequent purchases from (or sales to) minority interests in subsidiaries

Following the presentation of minority interests in equity any increases and decreases in ownership interests in subsidiaries without a change in control are recognised as equity transactions in the consolidated financial statements. Accordingly, any premium or discount on subsequent purchases of equity instruments from or sales of equity instruments to minority interests are recognised directly in equity of the parent shareholder.

Previously a premium on subsequent purchases of equity instruments from minorities were recognised as goodwill and premium or discount on subsequent disposal of equity instruments to minorities were taken to profit or loss as a capital item in the income statement.

4.8 Deferred contingent purchase considerations

Where a structured business combination contains a puttable instrument on the interest of apparent minority shareholders, then a financial liability for the present value of the best estimate thereof is recognised upon initial accounting for the business combination.

The liability arising is regarded as a deferred contingent purchase consideration and the unwinding of the present value discounting is presented as an interest expense. Any other change in the liability is recognised through goodwill as an adjustment to the cost of the business combination, including the impact of changes in interest rates on liabilities measured on the fair value basis.

If the puttable arrangement is not exercised and settled, the derecognition of the financial liability is treated as a disposal of the anticipated interest in the subsidiary in accordance with the group's accounting policy for common control transactions.

4.9 Earnings per share – cumulative preference shares

In order to calculate earnings attributable to ordinary shareholders, the amount of preference dividends (taking into account STC) for cumulative preference shares required for that period, whether or not declared is deducted from profit attributable to equity holders in determining earnings per ordinary share. The amount of preference dividends for the period used to calculate earnings per ordinary share does not include the amount of any preference dividends for cumulative preference shares paid or declared during the current period in respect of previous periods.

Increasing rate preference shares provide for an above-market dividend in later periods to compensate investors for purchasing preference shares at a premium. Any original issue premium on increasing rate preference shares is amortised to retained earnings using the effective interest method and treated as a preference dividend for the purposes of calculating earnings per ordinary share.

4.10 Capital items

Capital items are defined as items of income and expenditure relating to the acquisition, disposal or impairment of investments, businesses, property, plant and equipment and intangible assets, closure of businesses as well as the impairment of the goodwill.

Commentary

REVIEW OF RESULTS

INTRODUCTION

The Group's business model comprising an expanded geographical base, combining and growing the mix between third party sourcing and own manufacturing and diversification and integration, remains effective. The results were delivered in a period where the market conditions in Continental Europe and the United Kingdom continued to be competitive (although encouraging signs of recovery are becoming evident). Trading conditions in the Pacific Rim remained challenging, inter alia, as a result of deflation in product prices due to the strength of the Australian dollar. South Africa continued experiencing strong demand as a result of consumer confidence, a wider consumer base and economic fundamentals conducive to increased consumer spending. The acquisition of the listed retailer, Homestyle Group Plc effective from July 2005, has been integrated satisfactorily and augurs well for exciting growth opportunities in the UK, benefiting the Group globally.

The average exchange rate used for converting Euro income and expenditure to ZAR was R7,8714: 1 Euro compared to R7,8312: 1 Euro in respect of the corresponding six months in the previous financial year.

PERFORMANCE

The Group's revenues increased by 144% from R7 059 million to R17 235 million. A substantial portion of this increase was attributable to the consolidation of the results of Unitrans and Homestyle which became subsidiaries with effect from January 2005 and July 2005 respectively.

The Group generated 47% (2004: 71%) of its revenues in currencies other than South African Rand, principally Euro, Pound Sterling, US Dollar and Australian Dollar. The larger proportionate South African contribution to Rand-denominated revenue was caused by the inclusion of the results of Unitrans as a subsidiary, with revenue of R6 809 million for the period under review. The actual foreign revenue achieved in currencies other than South African Rand, but denominated in Euro, grew by 68% from Euro 581 million to Euro 977 million.

Headline earnings attributable to ordinary shareholders grew by 29% from R660 million in the six months ended 31 December 2004 to R851 million.

Headline earnings per ordinary share increased by 28% to 75 cents (2004: 59 cents) with basic earnings per ordinary share increasing 26% to 74 cents (2004: 59 cents). The weighted average number of ordinary shares in issue increased by 1% during the period to 1 132,3 million (2004: 1 126,3 million).

Ordinary shareholders' funds at 31 December 2005 amounted to R8 377 million (30 June 2005: R8 222) million. The annualised return on average ordinary shareholders' funds increased to 21% (2004: 20%). As at 30 June 2005 the net asset value per ordinary share grew to 738 cents from 727 cents per share. This increase is stated after the payment, in December 2005, of a 30 cents cash distribution per share from share premium (R340 million) and an adverse movement in the foreign currency translation reserve (R374 million) as a result of the strengthening in the spot Rand: Euro conversion rate of R8,0965: 1 Euro to R7,4670: 1 Euro at 30 June 2005 and 31 December 2005 respectively.

The Group's operational cash flow was R1 498 million (2004: R930 million). The net increase in working capital of R1 256 million (2004: R480 million), was attributable to an increase in accounts receivable commensurate with the Group's higher activity levels, particularly in South Africa which experienced strong growth, and, in the case of Homestyle, a reduction in creditors which included a once-off settlement with the UK Revenue Authorities of the VAT claim relating to past structural guarantee practices.

In order to compare the Group's operating margin on a like-for-like basis, the lower margins of Unitrans' Motor retail business and Homestyle should be eliminated. On this comparable basis, the Group's operating margin increased to 11,7% (2004: 10,9%). The Group continues to benefit from enhanced efficiencies throughout the supply chain, capacity utilisation as a result of, particularly, the addition of Homestyle (with a substantial retail distribution base), economies of scale and the Group's favourable terms of supply of finished products for resale.

Net finance expense for the period rose to R99 million (2004: R57 million) in accordance with the expanded Group operations. This expense included the funding costs incurred on the acquisition of Homestyle (being a net investment of approximately GBP 87 million) and the consolidation of Unitrans' own net finance expenses.

At 31 December 2005, Steinhoff had net interest-bearing debt of R3 596 million (30 June 2005: R1 988 million) resulting in a debt: equity ratio of 39% (30 June 2005: 22%), well within the Group's targeted debt : equity range. The increase of some R1,6 billion was mainly attributable to the investments in KAP International Holdings Limited (KAP) and Amalgamated Appliance Holdings Limited (Amap), amounting to R316 million and R281 million respectively. A further R514 million was due to the consolidation of Unitrans' debt, with the balance mainly relating to restoring Homestyle's creditors to normalised levels. The Group's permanent capital base was further enhanced by the issue of R650 million in perpetual preference shares in June 2005, followed by a further tranche of R350 million in November 2005.

The Group's taxation charge increased to R165 million (2004 : R95 million) in line with expectations. Management remains confident that the average tax rate of the Group will be stable at this level of approximately 15% of pre-tax income for the foreseeable future.

The Group's International Sourcing division has continued to perform well within the budgeted plan. The centralisation of all third party sourcing and distribution activities under the Pacific Rim division are delivering positive results. The wholesale, distribution and retail business segment, which, after the inclusion of Homestyle and Unitrans, now comprises 68% of Steinhoff's Group revenues, enhances the Group's flexibility and product offering and facilitates participation through additional added value segments of the supply chain.

Unitrans and Amap's results for the six months ended 31 December 2005 were pleasing with both companies reporting operating profit increases in excess of 20%. KAP has further released a positive trading statement relating to its next results to be reported on for the year ended 31 December 2005, wherein it states that it expects headline earnings per share to improve by between 20% and 30% compared to the prior period.

CORPORATE ACTIVITY

In addition to the corporate transactions concluded by Unitrans and reported on in its own results announcement dated 23 February 2006, the Group concluded the following corporate transactions during the six months under review:

- Steinhoff participated in the book-build process relating to the disposal of Salton Inc's 52% interest in Amap. Steinhoff currently holds 26,5% of Amap, an associated company, which is equity accounted. Markus Jooste and Danie van der Merwe joined the Board of Amap as non-executive directors and Jan van der Merwe (Steinhoff's Chief Financial Officer) was appointed to the Audit Committee;
- in November 2005, Steinhoff Investment Holdings Limited (Steinhoff Investments) issued a further tranche of R350 million variable rate, cumulative, non-redeemable, non-participating preference shares (perpetual preference shares);
- on 30 November 2005, Steinhoff Africa acquired 88,76 million shares in KAP for a total consideration of R316 million, equivalent to 356 cents per share. This holding represents an interest of 21% in KAP and Daun & Cie AG agreed to certain "lock-up" restrictions and pre-emptive rights in favour of Steinhoff, in respect

of its 44% remaining interest in KAP. Following this acquisition, which is also equity accounted, Markus Jooste remained on and Danie van der Merwe joined the board of KAP as non-executive directors and Jan van der Merwe joined KAP's Audit Committee;

- in December 2005, The Competition Tribunal approved the acquisition of the Group's 67% interest in the North Eastern Cape Forests Joint Venture (NECF) from Mondi South Africa Limited. These assets will form part of the establishment of a new chipboard plant and cluster development in that region. The Industrial Development Corporation will retain its 33% interest of the land and forests in question and Steinhoff has assumed management control with effect from 1 February 2006. The current estimated capital expenditure related to this project is R1,4 billion and it is anticipated that, directly and indirectly, approximately 3 000 new jobs will be created.

OUTLOOK

The new management structure at Homestyle is now fully operational and a strong turnaround is expected during the remainder of the current financial year. The consumer spending environment in the UK continued to be tough during the period under review, with only slight improvements being noticed since the January sales period. As a result, the consolidation trend prevalent in that market is expected to continue. Steinhoff and Homestyle stand to benefit substantially due to Homestyle's footprint and sound financial position (after its recapitalisation in July 2005), coupled with Steinhoff's world-wide sourcing and manufacturing capabilities.

In the German region, the Group continues to gain market share on the back of its existing relationships with major retailers and buying groups. Steinhoff has experienced good incremental business as a result of both organic and acquisitive growth achieved by Steinhoff's strategic retail customers in Germany. This should accelerate further consolidation and stand the Group in good stead as our partners continue their aggressive expansion plans. The German economy is showing moderate signs of recovery and increased consumer confidence. The level of order books in respect of both our main product categories and new ranges are growing.

The Steinhoff International Sourcing division is faring well and is making progress through supplementing the range and quality of the product offering worldwide. Management expects this division, in conjunction with an extended distribution base elsewhere in the world, to become a primary source of growth into the future. In Australia, the aggressive roll-out of the Leather Republic brand will continue. In addition, new store openings under existing brands and new marketing initiatives such as the launch of monthly catalogues, all bode well for increased activity in the second six months of the current financial year in this region.

The continued buoyancy in the South African retail sector is evident from recent results of, and reports on, Steinhoff's major customers. The expansion of PG Bison's Piet Retief plant, commissioned in May 2005, is running at full capacity and, as a result of the huge demand in the building and construction industry which outstrips the available supply, excess demand is satisfied through imports. Consequently, further investments in raw material production facilities, notably the NECF particle board plant and cluster development, will be made to secure future sustainable sources of supply.

Management expects to achieve growth in headline earnings from continuing operations for the remainder of the current financial year.

ORDINARY DIVIDEND OF STEINHOFF

It is the Group's policy to declare ordinary dividends once a year after its financial year end at 30 June

GENERAL

CORPORATE GOVERNANCE

Steinhoff has embraced the recommendations of King II on Corporate Governance and strives to provide reports to shareholders that are timely, accurate, consistent and informative.

SOCIAL RESPONSIBILITY

Steinhoff continues to be recognised for its corporate social investment activities. Management remains committed to the related initiatives and is conscious about the needs in this regard. A number of social responsibility projects are continuing. A good working relationship is maintained with the relevant Unions. Ongoing skills and equity activities continue to ensure compliance with current legislation.

Plans are also afoot in terms of initiatives embarked upon that will contribute to broader skills development and sourcing appropriately qualified staff on an ongoing basis.

RELATED PARTY TRANSACTIONS

The company entered into various related party transactions. These transactions are no less favourable than those arranged with third parties.

SUBSEQUENT EVENTS

No significant events, except for the NECF transaction referred to under "Corporate Activity", have occurred in the period between the reporting date and the date of this report.

STEINHOFF INVESTMENT HOLDINGS LIMITED

(Incorporated in the Republic of South Africa)
(Registration number: 1954/001893/06)
(JSE share code : SHFF) ISIN: ZAE 000068367
(Steinhoff Investments)

Steinhoff Investments is a wholly owned subsidiary of Steinhoff International Holdings Limited (Steinhoff) except for the 10 million variable rate, cumulative, non-redeemable, non-participating preference shares with a par value of 0,1 cent each in the capital of Steinhoff Investments, issued at a premium of R99,99 per share (the preference shares). The initial tranche of the preference shares were listed on the JSE Limited on 15 June 2005 and the second tranche listed in November 2005. Steinhoff Investments holds the entire issued share capital in the Group's two principal subsidiaries, Steinhoff Möbel Holdings Alpha GmbH and Steinhoff Africa Holdings (Proprietary) Limited.

The relevant financial information on Steinhoff and Steinhoff Investments for the six months ended 31 December 2005 is identical. Accordingly, no consolidated financial statements for Steinhoff Investments have been prepared in respect of the six months period under review, but preference shareholders are referred to the above results of Steinhoff for a full appreciation of the consolidated results and financial position of Steinhoff Investments.

DECLARATION OF DIVIDEND NUMBER 1 TO PREFERENCE SHAREHOLDERS

The board of Steinhoff Investments has resolved to declare a dividend of 431,507 cents per preference share in respect of the period from 15 June 2005 up to and including 31 December 2005 (the dividend period), payable on Monday, 24 April 2006, to those preference shareholders recorded in the books of the company at the close of business on Friday, 21 April 2006. This dividend has been determined on the basis of 75% of the prime bank overdraft lending rate of ABSA Bank Limited prevailing over the dividend period, applied to the nominal value plus premium of R100,00 per preference share, in the aggregate.

The dividend is payable in the currency of South Africa.

Last date to trade <i>cum</i> dividend	Wednesday, 12 April 2006
Shares trade <i>ex</i> dividend	Thursday, 13 April 2006
Record date	Friday, 21 April 2006
Payment date	Monday, 24 April 2006

No dematerialisation or rematerialisation of preference shares may take place between Thursday, 13 April 2006 and Friday, 21 April 2006, both dates inclusive.

On Monday 24 April 2006, the preference dividend will be electronically transferred to the bank accounts of preference shareholders. In all other instances of certificated holders, cheques dated 24 April 2006 will be posted on or about that date. Preference shareholders who have dematerialised their shares will have their accounts credited on Monday, 24 April 2006.
